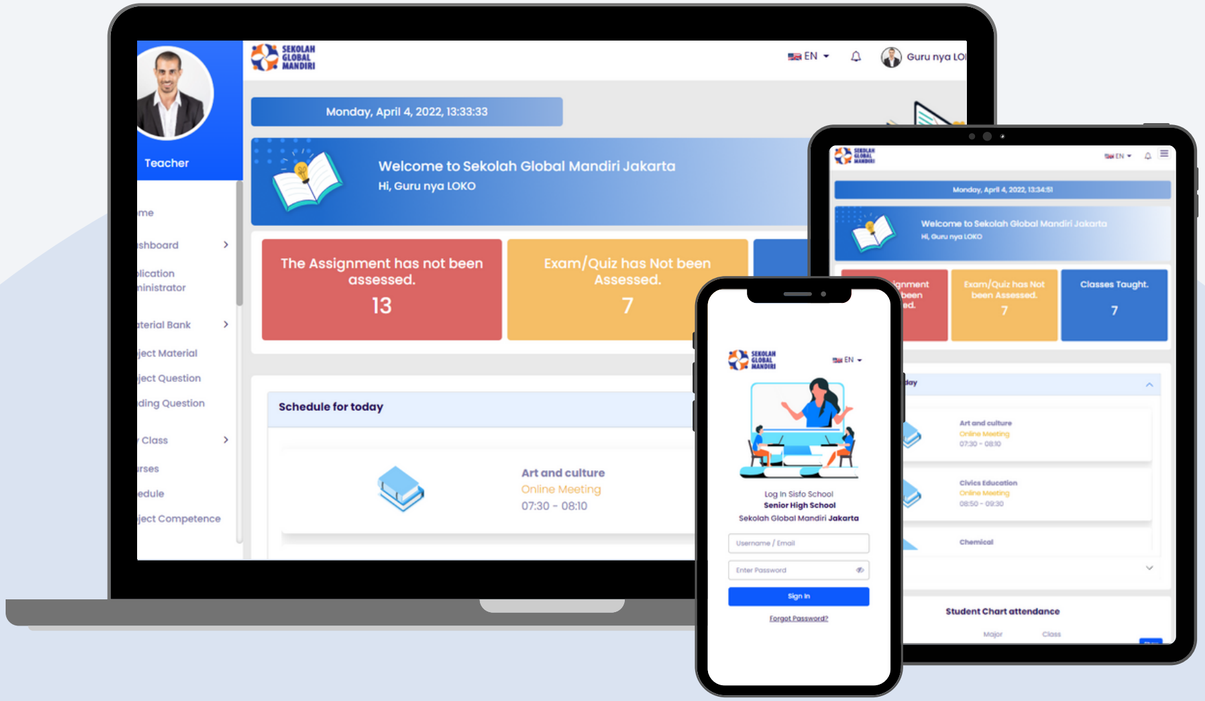
LOKO
IT SOLUTIONS



SISFO SCHOOL

Problems Nowadays

Registration

Registration still has to come to the place

Payment

- Payment is still manual (cash)
- Non-cash payment but not integrated

Separate LMS

- Separate LMS with administration application
- Virtual class applications such as zoom and google class are used separately from the system

Administration System and User Report

There are many disadvantages to managing Administrative and financial reports

LOKO IT SOLUTIONS | Sisfo School

We Are Here To Bring You The Solutions

REGISTRATION

The registration process can be done by smartphones, tablets, laptops, etc.

ONE SYSTEM LEARNING PROCESS

All systems including administration and LMS are integrated. The system has many features such as virtual learning etc.

PAYMENT

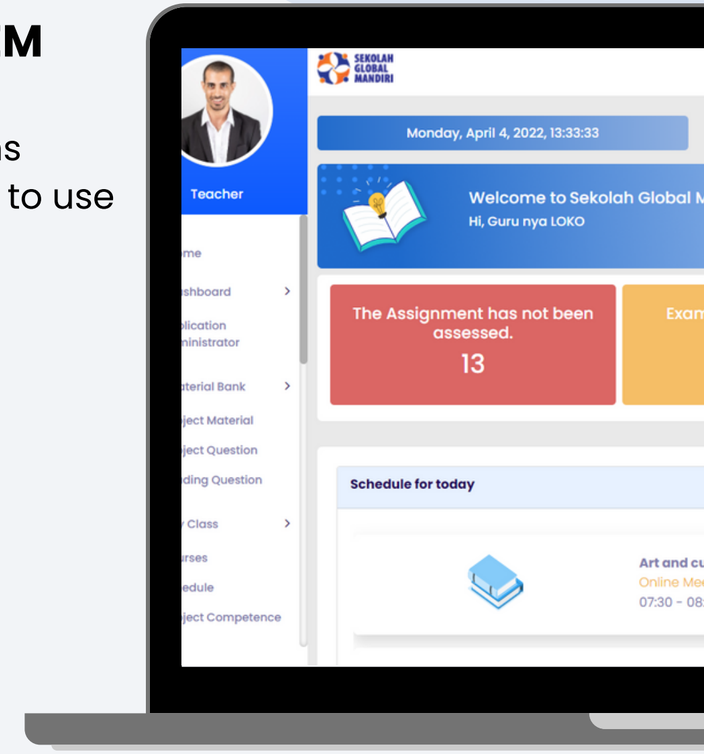
Payment processing can be done through payment features that have been integrated with third parties.

ADMINISTRATION SYSTEM AND USER REPORT

This system is made for admins reporting which make it easier to use and avoid human errors.

BLENDED LEARNING

Combining online and offline learning.



LOKO IT SOLUTIONS | Sisfo School

What is SISFO School?

Sisfo School is an integrated learning application for education, school administration, and finance.

LOKO IT SOLUTIONS | Sisfo School

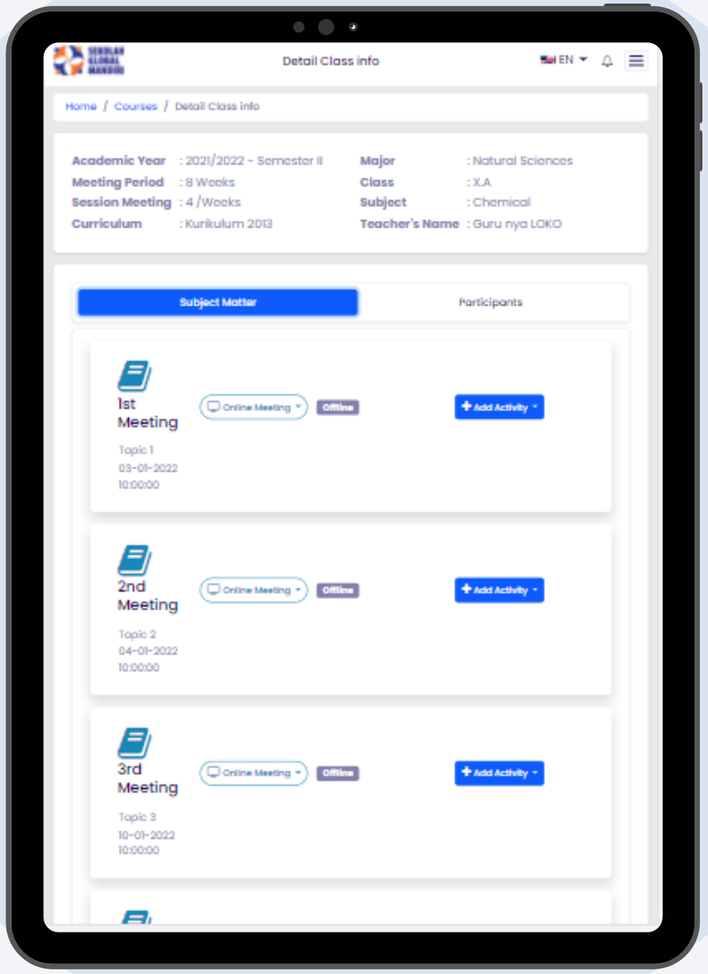
Feature Advantages

Fully Integrated

Information systems that can provide solutions in one unit of the system as a whole to improve operational efficiency and produce comprehensive information and reports.

Modular

Information Systems consist of modules with high flexibility, making it easier to implement, maintain, and add new modules.



Multi User - Multi Tasking

Able to be operated by users together without causing interruptions so that the data process is faster and more effective.

Client-Server Architecture

Designed with an architecture that is used for accessing data and transactions with a large capacity which includes business rules, user level, security, and programming methods

About Our Company...

Loko IT Solutions is a company engaged in information technology services, including software development services for system integration and infrastructure procurement. Currently, Loko is concentrating on developing a Hospital Management Information System (SIMRS) and a College and School Information System named SISFO Campus and SISFO School.
